## PROFESSIONAL SUMMARY

Software developer and AI-data specialist with an MCA and 3+ years of dedicated Python development, backed by a long track record in software engineering, database administration, and quality assurance. Builds full-stack web applications and backend systems in Python, .NET, C#, and Java, and optimizes complex SQL and Oracle PL/SQL workloads. Now focused on large-language-model evaluation — auditing generated code and content for factual and technical correctness across English, Hindi, Tamil, and Marathi. Writes and open-sources practical developer tooling, and turns hard software and data problems into clear, hands-on technical writing.

## TECHNICAL SKILLS

|                   |                                                                                                          |
|-------------------|----------------------------------------------------------------------------------------------------------|
| Languages         | Python (3+ yrs), C#, .NET / .NET Core, Java, C, C++, SQL, PL/SQL                                         |
| Web & Frameworks  | ASP.NET Core, Entity Framework, MVC, HTML, CSS, JavaScript                                               |
| Databases & Tools | Oracle (DBA & PL/SQL), SQL, MySQL, MariaDB, stored procedures, XAMPP, Git, MS Excel                      |
| AI & Data Quality | LLM output evaluation, factuality & STEM auditing, prompt evaluation, TTS quality (MOS), data annotation |
| Practices         | OOP & system design, debugging, database optimization, technical writing                                 |

## EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                     |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|

| <ul style="list-style-type: none"><li>Designed, built, and maintained custom software for vehicle showrooms and dealerships, streamlining sales and operational workflows.</li><li>Engineered scalable web applications and backend services with Python, .NET Core, C#, Entity Framework, MVC, and JavaScript.</li><li>Authored and optimized complex SQL, MySQL, and MariaDB stored procedures for high-performance data access.</li><li>Applied OOP principles to improve application architecture, scalability, and maintainability.</li></ul> |                     |
| Freelance Translator & Transcriptionist — Freelance                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | May 2024 – Apr 2025 |
| <ul style="list-style-type: none"><li>Delivered verbatim transcription and technical/general translation across English, Hindi, Tamil, and Marathi.</li><li>Performed systematic audio auditing to enforce transcription integrity and strict notation standards.</li></ul>                                                                                                                                                                                                                                                                        |                     |
| Quality Analyst — Datamatics Business Solutions Ltd                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Jul 2018 – 2024     |
| <ul style="list-style-type: none"><li>Analyzed project requirements for accurate resource estimation and turnaround-time (TAT) planning.</li><li>Maintained project logs and resource-utilization reports to optimize team efficiency.</li></ul>                                                                                                                                                                                                                                                                                                   |                     |
| Senior Research Associate — Datamatics Business Solutions Ltd                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | Apr 2016 – Jun 2018 |
| <ul style="list-style-type: none"><li>Led secondary-research initiatives and validated entity data using advanced web-search techniques.</li><li>Coordinated workflow and task allocation to meet client deadlines consistently.</li></ul>                                                                                                                                                                                                                                                                                                         |                     |

- Executed quality-control protocols on research datasets and delivered process training using MS Excel.

## PROJECTS & OPEN SOURCE

---

### llm-eval-harness

Python · standard library · pytest

A dependency-free harness for scoring LLM answers against a gold set, with per-question match rules (exact / contains / numeric), gold-file validation, actionable failure output, and a CI-friendly exit code. Open-sourced with tests and documentation.

### aspnet-minimal-api

C# · ASP.NET Core · .NET 8 · xUnit

A compact task-tracker Web API in a single file — full CRUD with input validation and correct HTTP status codes — with in-memory integration tests (WebApplicationFactory) that exercise the real endpoints; 7/7 tests passing.

### plsql-bulk-examples

Oracle PL/SQL

Runnable examples that convert a slow row-by-row load into fast batched processing with BULK COLLECT and FORALL, plus SAVE EXCEPTIONS error handling — an order-of-magnitude speedup demonstrated on a 200k-row table.

### Smart Maintenance Portal

Java · Python · MySQL · HTML/CSS

Full-stack web portal for submitting municipal complaints and tracking resolution, with an admin dashboard that routes complaints to departments and monitors real-time status.

## TECHNICAL WRITING

---

- Author of published technical tutorials and analysis on [dev.to](https://dev.to) covering LLM evaluation in Python, Oracle PL/SQL performance tuning, and multilingual model evaluation.

## EDUCATION & CERTIFICATIONS

---

### Master of Computer Applications (MCA)

Savitribai Phule Pune University · 2009–2012

### B.Sc. in Information Technology

Akbar Peerbhoy College · 2005 · 70%

### Oracle DBA & PL/SQL Certification

Karrox Technology · 2007

### HSC (Science)

The Malegaon High School & Jr. College · 2002 · 72%

## LANGUAGES

---

English, Hindi, Tamil, Marathi — professional fluency (native/near-native).
